

SLI Learning Search Connect

For hybris

Key Features

- Full hybris product catalogue indexing
- Scheduled feed creation & transfer
- Compatible with all versions of hybris 5
- Downloadable from the hybris Extend Marketplace

Key Benefits

Fast generation of feeds

Seamless integration

Rapid implementation

Low internal resource involvement

Fully customisable

 hybris extend

Now that's
a good
search result.

SLI Systems, a hybris Extend Marketplace partner, has developed Learning Search Connect for hybris (LSC-h) to provide the power of its full-service, learning based site search to retail clients using the hybris e-commerce platform. Learning Search Connect integrates with hybris to provide an outstanding level of search customisability by providing all features required for seamless integration.

Learning Search Connect ensures that the combined use of hybris and SLI becomes more coherent and easier to implement. Using Learning Search Connect extends the hybris Management Console to include Learning Search Connect for hybris configuration capabilities. After implementation of the extension, SLI will replace hybris' native site search with SLI's award-winning Learning Search.

Learning Search Connect automatically generates a data feed from hybris and sends it to SLI via FTP. No manual intervention on your side is required after initial implementation. SLI indexes the full catalogue of online product data, and creates customised search results pages that are consistent with your retail site's look and feel.

Other SLI products such as SLI Learning Recommendations or SLI Site Champion (user-generated SEO) can take advantage of this initial integration. In this way, Learning Search Connect allows the use of SLI's entire product range based on SLI's patented Learning Search technology.

Configuration of SLI Through the hybris Management Console

The screenshot displays the 'hybris management console' interface. The top navigation bar includes 'Home', 'Now', and a search bar. The left sidebar contains a navigation menu with categories like 'Administrator', 'System', 'Advanced Configuration', 'Tools', 'Output Documents', 'Types', 'Saved Queries', 'Report Definitions', 'Personalization', 'HMC configuration', 'License Search Indexes', 'Facet search', 'Workflow Administration', 'LDAP', 'CronJobs', 'Validators', 'Business Process', 'Catalog', 'Multimedia', 'User', 'Order', 'Price Settings', 'Internationalization', 'Marketing', 'Base Commerce', 'DeepLink Lite', and 'WCMS'. The main content area is divided into several sections:

- Search:** A search bar with 'Type: All System Configurations' and 'Attribute: Search additional attributes'. Below it is a table with columns 'Attribute', 'Locale', 'Comparator', and 'Value'. The table contains rows for 'Code', 'Name', 'Is enabled', 'FTP host', and 'FTP user name', each with a dropdown menu and an input field.
- Results:** A table showing search results with columns 'Code', 'Name', 'Is enabled', 'FTP user name', and 'FTP host'. The results include 'ApparelUKconfig' and 'stevensConfig2'.
- Editor - SLI Systems Configuration:** A section for editing the configuration. It includes tabs for 'General Capabilities', 'FTP Settings', 'Feed Settings', 'JavaScript', 'Product Attributes', and 'Administration'. The 'General Capabilities' tab is active, showing fields for 'Code' (ApparelUKconfig), 'Name' (Apparel-UK configuration), and 'Stores' (a table with columns 'ID', 'Name', 'Active', 'Content Catalogs', and 'SLI Systems Config'). Other fields include 'Is enabled' (checked), 'Log level' (DEBUG), and 'locale'.

Easily Access SLI's Suite of E-Commerce Products

Using Learning Search Connect enables you to take advantage of SLI's full suite of e-commerce products, including SLI Learning Search and Navigation, Learning Recommendations, Site Champion, Dynamic Product Banners and SLI Mobile. Additionally, you'll have access to the SLI Merchandising Console and Reporting, A/B and Multivariate Testing, Rich Auto Complete and AJAX search. This all comes with our 24/7 support from a dedicated customer success manager and our team of experts.

Cloud Service Done Right

SLI offers a highly redundant architecture that helps protect you from hardware or other service failures. This costs you nothing and is part of our effort to continuously offer the best service possible. Furthermore, as a hosted service we can readily scale to meet the needs of your site during peak shopping seasons.

About SLI Systems

SLI Systems enables the world's leading e-commerce retailers to increase sales by connecting shoppers with the products they're most likely to buy. With proven search technology that learns from the activity of real site visitors, SLI delivers SaaS-based site search, navigation, merchandising, mobile, recommendations and SEO solutions that arm retailers with the tools they need for rapid growth.
